Foot Ointments

IMPORTANT: You MUST do a patch test before using these products on your guinea

HOW TO DO A PATCH TEST: rub some of the product into a small area of skin on the back of the ear and just underneath where there is no hair. Check every couple of hours to ensure that there is no redness or irritation up to 8 hours after application. In the unlikely event that there is redness or irritation at any time, remove the product immediately. **Please also let me know so that I can provide you with an alternative solution.**

Perfect Paws Ointment

Perfect Paws Ointment is designed to help piggies with sore feet. Hard or cracked skin is no longer a problem and you will see an improvement within just a few days. Catch the problem early so that it doesn't turn into something nasty. Simply apply twice a day to your piggy's feet and massage in gently. Continue until the area is soft again and any cracks have healed.

Happy Soles Ointment

*****CONTAINS NUT OIL – DO NOT USE IF YOU HAVE A NUT ALLERGY!*****

Happy Soles Ointment is designed to help piggies with sore feet, especially Bumblefoot (also known as Pododermatitis). This condition is a swelling / ulceration of the foot pad that can be very painful for a guinea. It is often bacterial in origin but can also be fungal, and is difficult to treat.

Happy Soles Ointment has also been used successfully on guineas with bad fungal ears and on a dog with Wet Eczema. Simply apply twice a day to your piggy's feet and massage in gently. Continue until the area is soft again and any scabs have dropped off and the skin looks healthy again.

Check out our article on Bumblefoot for more information about the condition:
