**PLEASE READ THE INSTRUCTIONS CAREFULLY before using these products,
and keep them in a safe place for future reference.**

Lotions & Gels

**IMPORTANT: You MUST do a patch test before using each of these products
on your guinea**

HOW TO DO A PATCH TEST: rub some of the product into a small area of skin on the back of the ear and just underneath where there is no hair. Check every couple of hours to ensure that there is no redness or irritation up to 8 hours after application. In the unlikely even that there is redness or irritation at any time, remove the product immediately. Please also let me know so that I can provide you with an alternative solution.

Lotion: Lavender & Myrrh / Manuka

DO NOT USE ON PREGNANT SOWS.

Our Lotions have been designed for use in-between Melts to help your guinea's skin. The Lotion is light, non-greasy and easily absorbed by the skin. It has also been successfully used on guineas under 12 weeks old when a Melt cannot be used because the guinea is too young. Lotions are particularly effective on Fungal ears and around the eye area, and can also be used on small Fungal areas where a Melt is not required.

Apply a small amount to the affected area twice a day, and rub it in gently avoiding the eyes and mouth. You should expect to see an improvement in the skin within 7 days. Manuka has proved to be very effective for fungal skin problems, but where there is very dry / cracked skin the Lotion with Myrrh would be more appropriate.

Once the skin is looking better, keep applying the lotion for another week as fungal problems often recur if you stop too soon.

Lotion: Calendula

Instructions as above. Can be used on Pregnant Sows as it does not contain any Essential Oils.

Soothe Gel

- **Aloe Vera Gel** - plain gel, no essential oils, so can be used on pregnant sows. It is soothing, cooling and can help to reduce heat and redness in the skin.
- **Neem Gel** - Aloe Vera Gel with Neem and Lavender. Brilliant for calming irritated skin where there is a lot of scratching / scabbing.
DO NOT USE ON PREGNANT SOWS.
- **Soothe Gel** - the original version with Lavender and Niouli Essential Oils to help soothe minor cuts and abrasions.
DO NOT USE ON PREGNANT SOWS.

Apply the gel two or three times a day until the condition improves.
